CUSTOM ETCH LETTERS & NUMBERS

decorative door products
DEFINING DOORS

2020 STYLE GUIDE

86
Altrincham Road

The Decorative Door Products range of Custom Etch Letters and Numbers is available in a range of 8 standard styles (and 5 typefaces) ranging from traditional to contemporary and make a striking statement whether used in the door glass itself or in the sidelights/toplights.

We offer standard sizes for many of the most popular composite door configurations and also offer a custom size service for use in Toplights, Sidelights and for other door glass sizes.

Our range incorporates both clear numbers/ letters on a sandblasted background and negative versions with sandblasted characters on a clear background.

All our custom etch designs are produced using sandblast techniques and with our computer designed 'resist' cutter, we can ensure perfectly created letters and numbers every time.

Once the design is created, it is then incorporated within a high performance insulated glass unit using warm edge spacer and low E glass. For sidelights and areas where extra security may be required, we also offer the range in our Security+ laminated glass units.

Please Note: All our custom etch letters and numbers are created using sandblasting techniques and may look different to screen printed 'etch-effect' glass. We recommend any glass units which need to match visually, are ordered at the same time to ensure consistency.

Specifying your Custom Etched Letters and Numbers is as easy as 1...2...3...

1. Choose your **Glazing Style...**

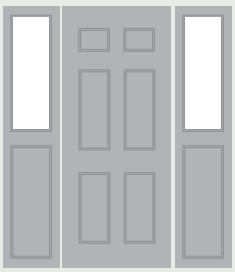
with Solid Base Unit



Double Split Sidelights
with Solid Base Units

As all custom numbers and names vary in length, font sizes will change dependant on the number of characters used. Customers should be aware that a general rule of thumb is that every 1 inch (25mm) of letter height provides 10ft (3metres) of readability with best impact.

Where possible we recommend numbers and lettering (except street names on sidelights) with a minimum of 150mm in height which will make them easily readable from 60ft (18metres) distance.

To calculate the size of the lettering we use the following ratio as standard:
Width of the glass (mm), minus 100mm, divided by the number of characters including spaces.

As all numbers/letters are custom manufactured returns cannot be accepted so please check with your supplier or our sales office before ordering if you have any questions.

For all sidelights and toplights, we recommend the use of 'Low E' glass to ensure compliance with Document L of the Building Regulations for England and Wales.
